

Combinations

The consistent use of color is vital to effective brand recognition. Our brand should always be represented in one of the colors on this page, aside from specific recommendations within this guide.

1. Use Sand colors in most cases.

This is our neutral palette that should be used for text, background colors, and most other visual elements.

2. Use Rust and Moss when variety is needed.

These are accent colors that can be used for hyperlinks and attention-grabbing elements (e.g., within an event graphic).

3. Use sufficient contrast between text and backgrounds.

Prefer Sand/1 or Sand/5 as the background color (for light and dark theme, respectively), with Sand/5 for the text color in light theme and Sand/1 for the text color in dark theme.

4. Prefer dark theme.

Dark theme is more provocative and better conveys the elegance inherent in our identity.
